Project Summary	Help us shape 21st century language learning at the Department of State! We need you to analyze online and mobile resources and determine how they deliver material and what makes their learning engaging and effective.
Country	United States
Agency	Department of State
DoS Office	FSI/SLS/CSD
Post	N/A
Section	N/A
Number of Interns	1

Project Description

Help us shape 21st century language learning at the Department of State! With the expected purchase of a new Learning Management System, the School of Language Studies is beginning to think about how to move some of our classroom materials and resources to an online format. We want to be informed about the state of online learning as we make this transition. We need you to analyze publicly-available resources and draw lessons learned about what makes their learning engaging and effective, how they deliver material, and how they ensure students have a quality experience. We want you to look at sites that are web-based and mobile-based, and draw lessons from how and when content and delivery mechanisms should change to accommodate how people access material. We teach foreign languages, but we want you to look at both language websites and sites for other types of learning, such as EdX and Khan Academy.

Desired Skills Interests

Additional Information

We cannot provide account access or equipment. You will need to sign up for free or trial accounts to access

sites, and you will need to use your personal laptop and tablet/mobile phone.

Language Requirements

None
